CHEMICO-BIOLOGICAL INTERACTIONS

SUBJECT INDEX

VOLUME 79 (1991)

Aldehydes, ascorbic acid, free radicals, glutathione, hemolytic activity, hydrogen peroxide, liposomes, ozonation, phosphatidylcholine, red blood cells (human), 41
Aldehyde dehydrogenase, induction, carcinogens, liver, rat, 79
Alkyl radicals, DNA-iron(III) complex, hydrazines oxidation, spin-trapping, 1
Alpha-1-proteinase inhibitor, aqueous cigarette tar extract, emphysema, hydrogen peroxide, antioxidants, radicals, 151
Amphiphile, antihaemolysis, vesicle release, shape alteration, detergent, erythrocyte, 335
Amphiphile, dehydroabietic acid, erythrocyte membrane, haemolysis, ion transport, shape alteration, 65
Antihaemolysis, vesicle release, shape alteration, amphiphile, detergent, erythrocyte, 335
Antioxidants, alpha-1-proteinase inhibitor, aqueous cigarette tar extract, emphysema, hydrogen peroxide, radicals, 151
Aqueous cigarette tar extract, alpha-1-proteinase inhibitor, emphysema, hydrogen peroxide, antioxidants, radicals, 151
Ascorbic acid, aldehydes, free radicals, glutathione, hemolytic activity, hydrogen peroxide, liposomes, ozonation, phosphatidylcholine, red blood cells, (human), 41

Benzo[*a*]pyrene metabolites, bioavailability in flounder, 305
Bioactivation, prostaglandin H synthase, xenobiotic, oxidation, 245
Bioavailability in flounder, benzo[*a*]pyrene metabolites, 305

Carcinogenicity, polycyclic aromatic hydrocarbons, dihydrodiol, metabolism, dihydrodiol dehydrogenase, 287
Carcinogens, aldehyde dehydrogenase, induction, liver, rat, 79
CC-1065 (antitumor antibiotic), DNA binding, circular dichroism, optical activity, 137
CC-1065 (antitumor antibiotics), DNA binding, sequence specificity, circular dichroism, kinetics, 265
Chemical carcinogenesis, cytochrome *P*-450, 7,12-dimethylbenz[*a*]anthracene, human liver, metabolism, 179
Chinese hamster V79 cells, 2-chlorodeoxyadenosine, DNA repair, repair inhibition, X irradiation, 349
2-Chlorodeoxyadenosine, DNA repair, repair inhibition, Chinese hamster V79 cells, X irradiation, 349
Chlorpromazine, lipid composition, drug membrane perturbation, verapamil, propranolol, electron paramagnetic resonance, 197
Chlorpromazine, polymorphonuclear leukocyte, oxidation, DNA adducts, covalent protein binding, myeloperoxidase, 15
Cholesterol, ketoconazole, tamoxifen, liposomes, lipid peroxidation, membrane stabilization, 229
Chromosome condensation, topoisomerase inhibitors, polyploidy, flow cytometry, G_2 block, 31
Circular dichroism, CC-1065 (antitumor antibiotic), DNA binding, optical activity, 137
Circular dichroism, CC-1065 (antitumor antibiotics), DNA binding, sequence specificity, kinetics, 265
Covalent protein binding, chlorpromazine, polymorphonuclear leukocyte, oxidation, DNA adducts, myeloperoxidase, 15
Cytochrome *P*-450, chemical carcinogenesis, 7,12-dimethylbenz[*a*]anthracene, human liver, metabolism, 179
Cytochrome *P*-450, olfactory mucosa, herbicide, dichlobenil, superoxide dismutase, 165
Cytotoxicity, 2′,3′-dideoxycytidine, metabolism, 53

Cytotoxicity, nitroalkanes, nitronates, microsomal metabolism, hepatocytes, 103

Dehydroabietic acid, amphiphile, erythrocyte membrane, haemolysis, ion transport, shape alteration, 65
2′-Deoxyguanosine, 8-hydroxy-2′-deoxyguanosine, guanine, magnesium, nickel, 217
2′-Deoxynucleosides, nickel, Ni(II), 2′-deoxynucleotides, DNA bases, 323
2′-Deoxynucleotides, nickel, Ni(II), 2′-deoxynucleosides, DNA bases, 323
Detergent, antihaemolysis, vesicle release, shape alteration, amphiphile, erythrocyte, 335
Dichlobenil, olfactory mucosa, herbicide, cytochrome *P*-450, superoxide dismutase, 165
2′,3′-Dideoxycytidine, cytotoxicity, metabolism, 53
Dihydrodiol, polycyclic aromatic hydrocarbons, metabolism, dihydrodiol dehydrogenase, carcinogenicity, 287
Dihydrodiol dehydrogenase, polycyclic aromatic hydrocarbons, dihydrodiol, metabolism, carcinogenicity, 287
7,12-Dimethylbenz[*a*]anthracene, chemical carcinogenesis, cytochrome *P*-450, human liver, metabolism, 179
DNA-iron(III) complex, hydrazines oxidation, alkyl radicals, spin-trapping, 1
DNA adducts, chlorpromazine, polymorphonuclear leukocyte, oxidation, covalent protein binding, myeloperoxidase, 15
DNA bases, nickel, Ni(II), 2′-deoxynucleosides, 2′-deoxynucleotides, 323
DNA binding, CC-1065 (antitumor antibiotics), sequence specificity, circular dichroism, kinetics, 265
DNA binding, CC-1065 (antitumor antibiotic), circular dichroism, optical activity, 137
DNA repair, 2-chlorodeoxyadenosine, repair inhibition, Chinese hamster V79 cells, X irradiation, 349
Drug membrane perturbation, lipid composition, verapamil, propranolol, chlorpromazine, electron paramagnetic resonance, 197

Electron paramagnetic resonance, lipid composition, drug membrane perturbation, verapamil, propranolol, chlorpromazine, 197
Emphysema, alpha-1-proteinase inhibitor, aqueous cigarette tar extract, hydrogen peroxide, antioxidants, radicals, 151
Erythrocyte, antihaemolysis, vesicle release, shape alteration, amphiphile, detergent, 335
Erythrocyte membrane, dehydroabietic acid, amphiphile, haemolysis, ion transport, shape alteration, 65

Flow cytometry, topoisomerase inhibitors, polyploidy, chromosome condensation, G_2 block, 31
Free radicals, aldehydes, ascorbic acid, glutathione, hemolytic activity, hydrogen peroxide, liposomes, ozonation, phosphatidylcholine, red blood cells (human), 41

G_2 block, topoisomerase inhibitors, polyploidy, chromosome condensation, flow cytometry, 31
Glutathione, aldehydes, ascorbic acid, free radicals, hemolytic activity, hydrogen peroxide, liposomes, ozonation, phosphatidylcholine, red blood cells (human), 41
Glutathione disulfide, oxygen radicals, Kupfler cell, neutrophil, inflammation, vascular injury, 115
Guanine, 2′-deoxyguanosine, 8-hydroxy-2′-deoxyguanosine, magnesium, nickel, 217

Haemolysis, dehydroabietic acid, amphiphile, erythrocyte membrane, ion transport, shape alteration, 65
Hemolytic activity, aldehydes, ascorbic acid, free radicals, glutathione, hydrogen peroxide, liposomes, ozonation, phosphatidylcholine, red blood cells (human), 41
Hepatocytes, nitroalkanes, nitronates, microsomal metabolism, cytotoxicity, 103
Herbicide, olfactory mucosa, dichlobenil, cytochrome *P*-450, superoxide dismutase, 165
Human liver, chemical carcinogenesis, cytochrome *P*-450, 7,12-dimethylbenz[*a*]anthracene, metabolism, 179
Hydrazines oxidation, DNA-iron(III) complex, alkyl radicals, spin-trapping, 1
Hydrogen peroxide, aldehydes, ascorbic acid, free radicals, glutathione, hemolytic activity, liposomes, ozonation, phosphatidylcholine, red blood cells (human), 41
Hydrogen peroxide, alpha-1-proteinase inhibitor, aqueous cigarette tar extract, emphysema, antioxidants, radicals, 151
8-Hydroxy-2′-deoxyguanosine, 2′-deoxyguanosine, guanine, magnesium, nickel, 217
Hydroxyethyldeoxyguanosine, hydroxyethylnitrosoureas, rat, liver, 207

Hydroxyethylnitrosoureas, rat, liver, hydroxyethyldeoxyguanosine, 207

Induction, aldehyde dehydrogenase, carcinogens, liver, rat, 79
Inflammation, oxygen radicals, glutathione disulfide, Kupfler cell, neutrophil, vascular injury, 115
Ion transport, dehydroabietic acid, amphiphile, erythrocyte membrane, haemolysis, shape alteration, 65

Ketoconazole, tamoxifen, liposomes, lipid peroxidation, membrane stabilization, cholesterol, 229
Kinetics, CC-1065 (antitumor antibiotics), DNA binding, sequence specificity, circular dichroism, 265
Kupfler cell, oxygen radicals, glutathione disulfide, neutrophil, inflammation, vascular injury, 115

Lipid composition, drug membrane perturbation, verapamil, propranolol, chlorpromazine, electron paramagnetic resonance, 197
Lipid peroxidation, ketoconazole, tamoxifen, liposomes, membrane stabilization, cholesterol, 229
Liposomes, aldehydes, ascorbic acid, free radicals, glutathione, hemolytic activity, hydrogen peroxide, ozonation, phosphatidylcholine, red blood cells (human), 41
Liposomes, ketoconazole, tamoxifen, lipid peroxidation, membrane stabilization, cholesterol, 229
Liver, aldehyde dehydrogenase, induction, carcinogens, rat, 79
Liver, hydroxyethylnitrosoureas, rat, hydroxyethyldeoxyguanosine, 207

Magnesium, 2′-deoxyguanosine, 8-hydroxy-2′-deoxyguanosine, guanine, nickel, 217
Membrane stabilization, ketoconazole, tamoxifen, liposomes, lipid peroxidation, cholesterol, 229
Metabolism, chemical carcinogenesis, cytochrome *P*-450, 7,12-dimethylbenz[*a*]anthracene, human liver, 179
Metabolism, 2′,3′-dideoxycytidine, cytotoxicity, 53
Metabolism, polycyclic aromatic hydrocarbons, dihydrodiol, dihydrodiol dehydrogenase, carcinogenicity, 287
Microsomal metabolism, nitroalkanes, nitronates, hepatocytes, cytotoxicity, 103
Microtubule proteins, selenite, sulfhydryl groups, tubulin, 91
Myeloperoxidase, chlorpromazine, polymorphonuclear leukocyte, oxidation, DNA adducts, covalent protein binding, 15

Neutrophil, oxygen radicals, glutathione disulfide, Kupfler cell, inflammation, vascular injury, 115
Ni(II), nickel, 2′-deoxynucleosides, 2′-deoxynucleotides, DNA bases, 323
Nickel, 2′-deoxyguanosine, 8-hydroxy-2′-deoxyguanosine, guanine, magnesium, 217
Nickel, Ni(II), 2′-deoxynucleosides, 2′-deoxynucleotides, DNA bases, 323
Nitroalkanes, nitronates, microsomal metabolism, hepatocytes, cytotoxicity, 103
Nitronates, nitroalkanes, microsomal metabolism, hepatocytes, cytotoxicity, 103

Olfactory mucosa, herbicide, dichlobenil, cytochrome *P*-450, superoxide dismutase, 165
Optical activity, CC-1065 (antitumor antibiotic), DNA binding, circular dichroism, 137
Oxidation, chlorpromazine, polymorphonuclear leukocyte, DNA adducts, covalent protein binding, myeloperoxidase, 15
Oxidation, prostaglandin H synthase, xenobiotic, bioactivation, 245
Oxygen radicals, glutathione disulfide, Kupfler cell, neutrophil, inflammation, vascular injury, 115
Ozonation, aldehydes, ascorbic acid, free radicals, glutathione, hemolytic activity, hydrogen peroxide, liposomes, phosphatidylcholine, red blood cells (human), 41

Phosphatidylcholine, aldehydes, ascorbic acid, free radicals, glutathione, hemolytic activity, hydrogen peroxide, liposomes, ozonation, red blood cells (human), 41
Polycyclic aromatic hydrocarbons, dihydrodiol, metabolism, dihydrodiol dehydrogenase, carcinogenicity, 287
Polymorphonuclear leukocyte, chlorpromazine, oxidation, DNA adducts, covalent protein binding, myeloperoxidase, 15
Polyploidy, topoisomerase inhibitors, chromosome condensation, flow cytometry, G_2 block, 31
Propranolol, lipid composition, drug membrane perturbation, verapamil, chlor-

promazine, electron paramagnetic resonance, 197
Prostaglandin H synthase, xenobiotic, oxidation, bioactivation, 245

Radicals, alpha-1-proteinase inhibitor, aqueous cigarette tar extract, emphysema, hydrogen peroxide, antioxidants, 151
Rat, aldehyde dehydrogenase, induction, carcinogens, liver, 79
Rat, hydroxyethylnitrosoureas, liver, hydroxyethyldeoxyguanosine, 207
Red blood cells (human), aldehydes, ascorbic acid, free radicals, glutathione, hemolytic activity, hydrogen peroxide, liposomes, ozonation, phosphatidylcholine, 41
Repair inhibition, 2-chlorodeoxyadenosine, DNA repair, Chinese hamster V79 cells, X irradiation, 349

Selenite, microtubule proteins, sulfhydryl groups, tubulin, 91
Sequence specificity, CC-1065 (antitumor antibiotics), DNA binding, circular dichroism, kinetics, 265
Shape alteration, antihaemolysis, vesicle release, amphiphile, detergent, erythrocyte, 335
Shape alteration, dehydroabietic acid, amphiphile, erythrocyte membrane, haemolysis, ion transport, 65
Spin-trapping, DNA-iron(III) complex, hydrazines oxidation, alkyl radicals, 1
Sulfhydryl groups, selenite, microtubule proteins, tubulin, 91
Superoxide dismutase, olfactory mucosa, herbicide, dichlobenil, cytochrome *P*-450, 165

Tamoxifen, ketoconazole, liposomes, lipid peroxidation, membrane stabilization, cholesterol, 229
Topoisomerase inhibitors, polyploidy, chromosome condensation, flow cytometry, G_2 block, 31
Tubulin, selenite, microtubule proteins, sulfhydryl groups, 91

Vascular injury, oxygen radicals, glutathione disulfide, Kupfler cell, neutrophil, inflammation, 115
Verapamil, lipid composition, drug membrane perturbation, propranolol, chlorpromazine, electron paramagnetic resonance, 197
Vesicle release, antihaemolysis, shape alteration, amphiphile, detergent, erythrocyte, 335

Xenobiotic, prostaglandin H synthase, oxidation, bioactivation, 245
X irradiation, 2-chlorodeoxyadenosine, DNA repair, repair inhibition, Chinese hamster V79 cells, 349

Chem.-Biol. Interactions, 79 (1991) 365–366
